

STRIKER ARTICULATED AUTOMATIC SCRUBBER

The **Striker** brings a new level of efficiency to the automatic scrubber market with its oversized 40 and 60 gallon solution and recovery tanks. You keep scrubbing longer with fewer delays for emptying and refilling of tanks, providing up to 100% productivity gain. The articulated steering system (bends in the middle) dramatically increases maneuverability, improves handling and allows for 150° of turning freedom with 100% water pickup. Total control zone steering system is designed with a steering wheel for easier operation and decreased operator fatigue. Wide industrial strength pneumatic four wheel base provides increased traction and stability unlike conventional caster units which may damage the floor.

STRIKER ARTICULATED AUTOMATIC SCRUBBER

Easy access to batteries and solution tank.

Controls are illustrated and at operator's fingertips.

Total Control Steering System

SPECIFICATIONS

Striker™ 2840

Order No:	218316 (28")
Capacity:	40 Gallons (Sol/Rec)
Brush Motor:	3/4 HP
Brush Speed:	200 RPM
Down Pressure:	0-200 lbs.
Demitting Chamber:	13 Gal
Vacuum Fan:	0.8 HP
Transaxle Motor:	0.4 HP
Dimensions:	49" H X 75.2" L X 24" W
Weight:	800 lbs. w/Batteries
Width:	30.7" (w/scrub head)
Squeegee width:	38.5"

Striker™ 3660

Order No:	219797 (36")
Capacity:	60 Gallons (Sol/Rec)
Brush Motor:	3/4 HP
Brush Speed:	200 RPM
Down Pressure:	0-200 lbs.
Demitting Chamber:	22 Gal
Vacuum Fan:	0.8 HP
Transaxle Motor:	0.5 HP
Dimensions:	49" H X 89.7" L X 28" W
Weight:	855 lbs. w/Batteries
Width:	38.6" (w/scrub head)
Squeegee width:	45.5"
